

Profile overview

I have excellent knowledge in high volume Finance Applications, specific in the industries Telecommunication, Utilities, Hightech, Internet Shops, Media and Transport. I have more than 30 years experience with SAP systems and working since 1990 as consultant.

Since 1993 I was working primary in high volume Finance Applications (RM-CA) starting with R2 / RIVA and moved 1997 to IS-U and IS-T. Since 2006 I covered also the area of Billing and Invoicing in this areas (CI = Convergent Invoicing).

Since 1999 I was active worldwide in projects. I build up a broad generic SAP and process knowledge, which made me known as Telco and C2C expert. Based on this experience I gained experience in process level as well as on technical level.

Sales, Finance and Invoice processes in the industries Telecommunication, Hightech, Card payments, Internet business, Media, Railways, Container shipment and Toll collection as well as system Sizing C2C mass processes billing, invoicing and subledger accounting and the connection to GL are part of my experience.
